Creating physical or online resources based on the Frogans technology

Thomas Panau,

in-house lawyer

OP3FT

FROGANS
TECHNOLOGY

Why create physical or online resources?

- Creators need to learn
- This kind of resource is the way the Web is growing
- Now we can find out all about the Web and related technologies (HTML, CSS, JS, PHP, XML, etc.), either for free or for a fee (training online, in real-life)

What can I use to create resources based on the Frogans technology?

- All resources made available by the OP3FT are re-usable free-of-charge:

  - Online documentation

  - Technical specifications

  - Policies

  - Messages posted on mailing lists

  - Presentations

  - Videos

  - Software

  - Commented sample elements (Frogans sites or reference implementations)

  ...

What are my obligations when I use OP3FT's resources?

- Give credit where it's due (e.g., declare the OP3FT is the source)
- Link to legal resources as needed (e.g., add a link to the Web page of the Frogans Technology Users Policy)
- Avoid confusion (e.g. Frogans Player, "Frogans Trademark"…)

How to exploit the resources I create?

- You can freely exploit all the resources based on the Frogans technology that you create (including for commercial purposes)

- No declaration to the OP3FT and no royalties

- You can contribute to the development of the Frogans Technology
